

Canadian Polystyrene Recycling Alliance  
Alliance de recyclage du polystyrène du Canada

February 5th, 2010

To Whom It May Concern:

We regret to inform you that CPRA's Transmere Drive, Mississauga, Ontario polystyrene washing operations and processing plant have been shut down and will not accept any further deliveries from its suppliers at this location. Please suspend all shipments to our Mississauga plant effective immediately.

During this closure CPRA will be reorganized and moved to its Port Hope, Ontario operations. CPRA will change its operations to only accept "clean, dry" polystyrene from depot and curbside operations that meet our specifications. There are strong markets right here in Ontario for clean polystyrene.

We are interested in working cooperatively with municipalities to recycle these materials.

CPRA will continue to supply recycled PS to its sister companies Polyframe, Picture Depot and North American Mouldings to be manufactured into picture frames, construction & decorative mouldings and supply other markets.

Further information will be provided by CPRA once these plans are finalized.

Regards,
